Dear All

Many thanks.

As mentioned in the submission, an earlier version of this paper is on the physics arXiv at arXiv:1502.07251

as ever

Bob

RE: Manuscript Submission Editor Assignment  
Journal: Chemical Reviews  
Manuscript ID: cr-2015-001477  
Title: "Mass Action and Conservation of Current"  
Author(s): Eisenberg, Robert

Dear Dr. Eisenberg:

We are pleased to acknowledge receipt of your Thematic Review cr-2015-001477 entitled "Mass Action and Conservation of Current". We are considering the Thematic Review with the understanding that it has been submitted on an exclusive basis.

The editor indicated below will write you of our decision regarding the Thematic Review as soon as possible. Please address all future correspondence regarding this Thematic Review to the assigned editor.

Prof. Robert D. Kuchta  
Associate Editor, Chemical Reviews  
303-735-0224 phone  
202-354-5237 fax  
[s.richter@chemrev.acs.org](mailto:s.richter@chemrev.acs.org)

Submission of a Thematic Review to Chemical Reviews implies that the work reported therein has not received prior publication and is not under consideration for publication elsewhere in any medium, including electronic journals and computer databases of a public nature. If otherwise, please advise.

Also please note that according to ACS Ethical Guidelines to Publication of Chemical Research, all authors must have reviewed and approved the submission of their manuscript. If you are a coauthor and approve its submission, no action is necessary. If you do not approve its submission to Chemical Reviews, please let us know as soon as possible. Refer to the manuscript number listed above in any correspondence, or you may simply reply to this message leaving the subject line intact. For more information on ethical responsibilities of authors, see the Ethical Guidelines to Publication of Chemical Research at <http://pubs.acs.org/page/policy/ethics/index.html>.

ACS Publications uses CrossCheck's iThenticate software to detect instances of similarity in submitted manuscripts. In publishing only original research, ACS is committed to deterring plagiarism, including self-plagiarism. Your manuscript may be screened for similarity to published material.

If you are reprinting figures or other items from non-ACS journals, please begin requesting copyright permission to reprint already published material from non-ACS journals, in case it is relevant for your submission. Please let us know if no permissions are required, i.e., you created all images

yourselves, or are reprinting them from published articles in ACS journals. So that you can start the process to request copyright permission to reprint or adapt figures or tables from other publishers, please click on the link Copyright Permission Request Form: [http://pubs.acs.org/page/copyright/permissions\\_otherpub.html](http://pubs.acs.org/page/copyright/permissions_otherpub.html).

This process does not need to be completed before submission, but it is best accomplished early and should be submitted with the revised manuscript. Your manuscript cannot be accepted or sent for production until all required copyright permissions have been obtained. If you have any technical questions concerning the copyright permissions, please contact the ACS Copyright Office at [copyright@acs.org](mailto:copyright@acs.org).

All authors are invited to submit cover art for consideration. The cover art should be an original figure that has not been published previously, even by the same author. The resolution should be at least 300 pixels per inch. The author should mention in the cover letter that potential cover art is being submitted and should upload it with the File Designation "Supporting Information for Review Only." For Thematic Issues, the Guest Editors may provide the cover art. The Editor will make decisions about cover art for each issue. A separate copyright form may be required for the cover art.

Sincerely,  
Chemical Reviews Editorial Office
